

## MEET CHRISTIAN DRAPEAU

### Scientist

Christian Drapeau is America's best known advocate for Adult Stem Cell research and the health applications of Adult Stem Cell science. He gained worldwide recognition when a Nobel Prize winning discovery in 2008 affirmed what Christian had been advocating for years: the role of Adult Stem Cells in the body is nothing less than its natural healing system.

### Author

*Cracking the Stem Cell Code* is Christian's newest book (Sutton Hart Press, January 2010). With it, the author demystifies the most important scientific breakthrough of our times. He reveals the far reaching potential of Adult Stem Cells in human health and wellness and looks at what's new, what's real and what's next in stem cell science. For more information on the book: [www.crackingthestemcellcode.com](http://www.crackingthestemcellcode.com).

“The implications of new developments in Adult Stem Cell science for the elimination of disease and self-healing of organs are mind boggling”

Christian Drapeau

Christian's 2009 volume *The Stem Cell Theory of Renewal* (Sutton Hart Press, 2009) shattered all U.S. sales records for stem cell titles in its first six months. It is now in print in French and Spanish with international distribution.

### Entrepreneur

Christian co-founded Southern California-based STEMTech HealthSciences, now a multi-national research and supplement manufacturing-distribution firm focused on adult stem cell science and stem cell nutrition. He remains its Chief Science Officer and creator of several products designed to naturally enhance stem cell production and their effective distribution in the body.

### Speaker

Christian Drapeau travels more than 100,000 miles each year speaking at medical, scientific, public, and business events on six continents. A featured Mensa national event speaker, he is known for a unique ability to present a scientific subject in a manner fascinating to all audiences. His compelling message coincides with *Time Magazine's* 2009 cover message: *The Coming Revolution in Stem Cells Could Save Your Life*.

### Qualifications

Christian holds a BS in Neurophysiology from McGill University and a Master of Science in Neurology and Neurosurgery from the Montreal Neurological Institute. He is a regular contributor to scientific articles and presents his information frequently at medical and scientific events in a dozen countries.
